

MenuWorks - Web Services 3.1

Description

This document defines the API structure for the MenuWorks - Web Services 3.1.

This is a RESTful web service on top of the MenuWorks menu platform. It is developed to serve data to internal & external client applications. Menus are abstracted out, and data can be requested by Unit (Team) and Locations (Venues). The data is an aggregate of all menus visible to that team and location that have been indicated as published in MenuWorks.

Common Specification for all APIs

URLs

Production - <https://services.webtrition.com/serviceapi/>

Staging - <https://services.webtrition.com/serviceapi/>

QA - <https://services.webtrition.com/serviceapi/>

Sample URL to the QA UOM Endpoint

https://servicesqa.webtrition.com/serviceapi/v3/units_of_measure

JSON Standards

JSON strings (property names and string values) - The system only accepts property names and string values in double quotes (based on [RFC 8259](#) specification) and is the only format considered as valid JSON.

Request Header

WT-Client-Id: {alphaNumericClientId}

{alphaNumericClientId} : Identifier of the client, provided by the MenuWorks web service team. This should be passed in header with all the Web Service API requests.

Response Header

Content-Type: application/json

Response Codes

200 – Success

401 – Unauthorized/Invalid wt-client-id

500/5000/5001/5002 – Internal Server Error

4000 – Invalid URL and/or Parameter(s)

4001 – Business Unit doesn't exist or is not available for the supplied wt-client-id

4002 – Location does not exist for the supplied Business Unit

4003 – Required Parameter(s) has not been provided

Date Time Format

All the dates and dateTimes should be in EST, and formatted as Iso8601Literal

Date: YYYY-MM-DD

DateTime: YYYY-MM-DDThh:mm:ss[.nnnnnnnn]

Options

Many of the API Endpoints will take configuration settings as part of the URI in an options parameter. The values passed are a collection JSON objects for *includes*, *filter* and *page*. While each call has its own specific values, *includes* are used to determine what data is returned, *filter* is used to refine returned dataset and *page* is explained below.

Sample Options

```
?options={"filter": {"startDate": "2024-04-05", "days": 1}, "include": {"nutrientTypes": ["Standard"], "ingredients": false, "allergens": true, "icons": true}}
```

Pagination

All the responses which can potentially be large in size, will be paged by default. The default for page.limit will be documented while defining the individual APIs.

Inside the options query parameter, the client can request for paged response (as shown below).

```
{
  "page": {
    "offset": "{int: page number to return}",
    "limit": "{int: the number of items returned per page}"
  }
}
```

Each paginated response will include the following section.

```
"paginationDetails": {
  "offset": "{int: current page}",
  "count": {
    "recordsReturned": "{int: records on current page}",
    "totalRecordsAvailable": "{int: total records that can be returned}"
  }
}
```

Business Unit ID

The MenuWorks API was built around a security model that only returns data for the supplied Business Unit {unitId}. As the usage of the API has expanded for mass data synchronization, we've adjusted this so a -1 value can be passed in and the response will return all values across all Business Units that the account has access to. Each API call has been notated if it accepts a -1 value.

Business Enumerations

Possible values of containsEnum are:

- Yes: Contains the mentioned allergen.

- No: Doesn't contain the mentioned allergen.
- AtRisk: Chances are that the mentioned allergen is present.

Possible values of nutrientTypeEnum are:

- Standard: Standard nutrient.
- Extended: Extended nutrient.

Possible values of menuTypeEnum are:

- Retail: Retail menus.
- HealthCare: HealthCare menus.
- Possible values of itemGroupingsEnum are,
- Diet: Diet.
- MealPeriod: MealPeriod.
- MealCategory: MealCategory.
- Station: Station.

Possible values of productTypeEnum are:

- Ingredient
- Recipe

Possible values of itemGroupingTypeEnum are:

- Diet
- MealPeriod
- Station
- MealCategory

Commonly Used Terms

mrn: Unique Master Reference Number of a product.

gtin: Global Trade Item Number.

API Endpoints

Units of Measure

Returns the list of Units of Measure (UOM) from the system.

URL	/v3/units_of_measure
Method	GET
Success Response	Code: 200 - OK

URL Parameters

None

Response Content

```
{
  "meta": {
    "version": {
      "current": {int: requested version},
      "latest": {int: latest endpoint version}
    },
  },
  "data": {
    "unitsOfMeasure": [
      {
        "id": {int: Id of unit of measure},
        "name": "{string: Name of unit of measure}",
        "shortName": "{string: Short name of unit of measure}"
      }
    ]
  }
}
```

Sample Response

```
{
  "meta": {
    "version": {
      "current": 3,
      "latest": 3
    },
  },
  "data": {
    "unitsOfMeasure": [
      {
        "id": 1,
        "name": "L",
        "shortName": "L"
      },
      {
        "id": 5,
        "name": "floz",
        "shortName": "floz"
      }
    ]
  }
}
```

Business Units

Provides list of all business units available/visible to the requesting client

URL	/v3/business_units
Method	GET
Success Response	Code: 200 - OK

URL Parameters

None

Response Content

```
{
  "meta": {
    "version": {
      "current": {int: requested version},
      "latest": {int: latest endpoint version}
    },
    "data": {
      "businessUnits": [
        {
          "id": "{int: Business Unit Id}",
          "name": "{string: Business Unit Name}",
          "sectorName": "{string: Sector of the Business Unit}"
        }
      ]
    }
  }
}
```

Sample Response

```
{
  "meta": {
    "version": {
      "current": 3,
      "latest": 3
    },
    "data": {
      "businessUnits": [
        {
          "id": "29015",
          "name": "SENTARA NORTHERN VIRGINIA",
          "sectorName": "Morrison Healthcare Sector"
        },
        {
          "id": "40411",
          "name": "MAYO CLINIC OAKRIDGE",
          "sectorName": "Morrison Healthcare Sector"
        }
      ]
    }
  }
}
```

Business Unit

Provides the business unit resource corresponding to given business unit id

URL	/v3/business_units/{unitId}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	int	Yes	N/A	Business Unit Id

Response Content

```
{
  "meta": {
    "version": {
      "current": {int: requested version},
      "latest": {int: latest endpoint version}
    },
  },
  "data": {
    "businessUnit": {
      "id": "{int: Business Unit Id}",
      "name": "{string: Business Unit Name}",
      "sectorName": "{string: Sector of the Business Unit}"
    }
  }
}
```

Sample Response

```
{
  "meta": {
    "version": {
      "current": 3,
      "latest": 3
    },
  },
  "data": {
    "businessUnit": {
      "id": "29015",
      "name": "SENTARA NORTHERN VIRGINIA",
      "sectorName": "Morrison Healthcare Sector"
    }
  }
}
```

Tags

For the given business unit, returns the list of visible tags from the system

URL	/v3/business_units/{unitId}/tags
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id, allows for -1
options	Json	No	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	50	Number of records per page

Response Content

```
{
  "meta": {
    "version": {
      "current": {int: requested version},
      "latest": {int: latest endpoint version}
    }
  },
  "paginationDetails": {
    "offSet": "{int: current page}",
    "count": {
      "recordsReturned": "{int: records on current page}",
      "totalRecordsAvailable": "{int: total records that can be returned}"
    }
  },
  "data": {
    "tags": [
      {
        "id": {int: tag Id},
        "name": "{string: Tag name}",
        "level": {int: Level of the tag},
        "parentId": {int, optional: Parent id of tag}
      }
    ]
  }
}
```

Sample Content

```
{
  "meta": {
    "version": {
      "current": 3,
      "latest": 3
    }
  },
  "paginationDetails": {
    "offSet": 2,
    "count": {
      "recordsReturned": 50,
      "totalRecordsAvailable": 121
    }
  }
}
```

```
},
"data": {
  "tags": [
    {
      "id": 389,
      "name": "Recipe Category",
      "level": 1
    },
    {
      "id": 394,
      "name": "Accompany",
      "level": 2,
      "parentId": 389
    }
  ]
}
```

Locations

Provides a list of all active/available Business Unit Locations corresponding to the given Business Unit Id

URL	/v3/business_units/{unitId}/locations
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id, allows for -1
options	Json	No	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	10	Number of records per page

Response Content

```
{
  "meta": {
    "version": {
      "current": "{int: requested version}",
      "latest": "{int: latest endpoint version}"
    },
    "paginationDetails": {
      "offset": "{int: current page}",
      "count": {
        "recordsReturned": "{int: records on current page}",
        "totalRecordsAvailable": "{int: total records that can be returned}"
      }
    },
    "data": {
      "locations": [
        {
          "id": "{int: Location Id}",
          "name": "{string: Location Name}",
          "displayOnPackageLabel": "{bool: Specifies if this is location appears on package labels}",
          "isPackagingLocation": "{bool: Specifies if this is a packaging location}",
          "geoCode": "{string: Lat, Long of Location}",
          "mapURL": "{string: link to google maps}",
          "address": {
            "line1": "{string: Address line 1}",
            "line2": "{string: Address line 2}",
            "city": "{string: City}",
            "state": "{string: State}",
            "postalCode": "{string: Postal/Zip code}",
            "country": "{string: country}"
          },
          "hours": [{
            "name": "{string: Type of hour}",
            "day": "{string: Day of the week these hours are applicable for}",
            "openHour": "{string: Hour of the day this location opens}",
            "closeHour": "{string: Hour of the day this location closes}"
          }],
          "availableDays": ["{dayOfWeekEnum: Day of the week the location is available}"]
        }
      ]
    }
  }
}
```

```
    ]
  }
}
```

Sample Response

```
{

        ]
      }
    ]
  }
}
```

Location

Provides the active/available Business Unit Location corresponding to the given Location Id

URL	/v3/business_units/{unitId}/locations/{locationId}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id
locationId	Int	Yes	N/A	Location Id
options	Json	No	Empty	Options for the endpoint
options.include	Json	No	Empty	Related entities to include
options.include.itemGroupings	Bool	No	False	Specifies whether item-groupings should be included

Response Content

```
{
  "meta": {
    "version": {
      "current": {int: requested version},
      "latest": {int: latest endpoint version}
    }
  },

        "Saturday"
      ]
    }
  }
}
```

Products

For the given business unit, returns a list of Products based on the given filter criteria

URL	/v3/business_units/{unitId}/products?options={options}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id, allows for -1
options	Json	No	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	10	Number of records per page
options.filter	Json	No	Empty	Filter Options
options.filter.tagids	int	No	Empty – No Filter	Products with these tagIds will be returned
options.filter.modifiedSince	Datetime	No	Empty – No Filter	Products modified after this date will be returned
options.filter.producttypes	[productTypeEnum]	No	Empty – No Filter	Only Products with specified productTypes will be returned
options.filter.changeStartDate	Datetime	No	Empty - No Filter	Initial Date of Changes
options.filter.changeEndDate	Datetime	No	Empty – No Filter	Final Date of Changes

Response Content

```

      }
    ]
  }
}

```

Scaled Menu Items

For the given business unit, based on provided scaling options, returns the scaled nutrient summary.

URL	/v3/business_units/{unitId}/ menu_items/scaled_nutrient_summary?options={options}
Method	GET
Success Response	Code: 200 – OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id
options	Json	No	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	10	Number of records per page
options.include	Json	No	Empty	Related entities to include
options.include.nutrientTypes	[nutrientTypeEnum]	No	Standard	Specifies whether Standard / Extended nutrients should be included
options.menuItems	Json	Yes	Empty	Menu Items to be scaled
options.menuItems.id	Int	Yes	N/A	Id of menu Item
options.menuItems.scale	Int	Yes	N/A	Scaling factor for nutrients
options.filter	Json	Yes	N/A	Filter Options
options.filter.locationId	Int	Yes	N/A	Products with these tagIds will be returned
options.filter.type	menuTypeEnum	No	Empty – No Filter	Type of Menu

Response Content

```
{
  meta: {
    "version": {
      "current": {int: requested version},
      "latest": {int: latest endpoint version}
    },
    "paginationDetails": {
      "offset": "{int: current page}",
      "count": {
        "recordsReturned": "{int: records on current page}",
        "totalRecordsAvailable": "{int: total records that can be returned}"
      }
    },
    "data": {
      "menuItems": [
        {
          "id": {int: Id of the Menu Item},
          "menuCollectionId": {int: menu item collection id},

Recipes

For the given business unit & master reference number, it returns the recipe information.

URL	/v3/business_units/{unitId}/recipes/{mrn}?options={queryParams}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id, allows for -1
mrn	Int	Yes	N/A	Master reference number of the requested recipe
options	Json	No	Empty	Options for the endpoint
options.include	Json	No	Empty	Related entities to include
options.include.nutrientTypes	[nutrientTypeEnum]	No	Standard	Specifies whether Standard / Extended nutrients should be included
options.include.allergens	Bool	No	False	Specifies whether allergens should be included
options.include.ingredients	Bool	No	False	Specifies whether ingredients should be included
options.include.tags	Bool	No	False	Specifies whether tags should be included
options.include.preparationSteps	Bool	No	False	Specifies whether preparation steps should be included
options.include.pictures	Bool	No	False	Specifies whether pictures should be included
options.include.conversions	Bool	No	False	Specifies whether conversions should be included
options.include.icons	Bool	No	False	Specifies whether icons should be included
options.include.entityAttributeValues	Bool	No	False	Specifies whether entity attributes should be included
options.include.advancedEdit	Bool	No	False	Specifies whether advanced edit values should be included
options.filter	Json	No	Empty	Filter Options
options.filter.changeStartDate	Datetime	No	Empty – No Filter	Initial Date of Changes
options.filter.changeEndDate	Datetime	No	Empty – No Filter	Final Date of Changes

Menu Templates

Provides a list of menu templates for each menu collection published to a location, for the given Location Id. Response includes: an array of Menu Collections with Meal Periods, Diets, Stations/Meal Categories depending on the type of business.

URL	/v3/business_units/{unitId}/locations/{locationId}/menu_templates?options={queryParams}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id, allows for -1
locationId	Int	Yes	N/A	Location Id
options	Json	No	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	10	Number of records per page
options.filter	Json	No	Empty	Related entities to include
options.filter.type	menuTypeEnum	No	Empty – No Filter	MenuType
options.filter.startDate	DateTime	No	Empty – No Filter	Menu Collection Start Date
options.filter.endDate	DateTime	No	Empty – No Filter	Menu Collection End Date
options.filter.changeStartDate	Datetime	No	Empty – No Filter	Initial Date of Changes
options.filter.changeEndDate	Datetime	No	Empty – No Filter	Final Date of Changes

Menu Items

Items with additional resources Nutrients, Allergens, Ingredients, Tags, and Icons are included if requested.

URL	/v3/business_units/{unitId}/menu_items?options={queryParams}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id, allows for -1
options	Json	No	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	10	Number of records per page
options.filter	Json	No	Empty	Related entities to include
options.filter.locationId	Int	No	Empty – No Filter	Location Id
options.filter.menuCollectionId	Int	No	Empty – No Filter	Menu Collection Id
options.filter.startDate	Date	Yes	N/A	Start Date
options.filter.days	Int	Yes	N/A	Number of Days
options.filter.mealPeriodId	Int	No	Empty – No Filter	Meal Period Id
options.filter.mealCategoryId	Int	No	Empty – No Filter	Meal Category Id
options.filter.dietId	Int	No	Empty – No Filter	Diet Id
options.filter.stationId	Int	No	Empty – No Filter	Station Id
options.filter.searchPhrase	String	No	Empty – No Filter	Filter to limit results to menu items whose names contain the searched phrase options.
options.filter.type	menuTypeEnum	No	Empty – No Filter	Type of Menu
options.filter.changeStartDate	Datetime	No	Empty – No Filter	Initial Date of Changes
options.filter.changeEndDate	Datetime	No	Empty – Not Filter	Final Date of Changes
options.include	Json	No	Empty	Include Options
options.include.allergens	Bool	No	False	If allergens should be included in the response, default is false
options.itemsNoMealCount	Bool	No	True	If MenuItems with No Meal counts should be included
options.include.nutrientTypes	[nutrientTypeEnum]	No	Standard	Specifies whether Standard / Extended nutrients should be included
options.include.ingredients	Bool	No	False	If ingredients details should be included in the response feed, default is false

options.include.tags	Bool	No	False	If tags should be included in the response feed, default is false
options.include.icons	Bool	No	False	If icons details should be included in the response feed, default is false
options.include.ComboDetails	Bool	No	False	If combo item details should be included in the response feed, default is false

Menu Board

Returns a distinct list of Menu Items and the locations they are served at with additional resources
Nutrients, Allergens, Ingredients, Tags, and Icons are included if requested.

URL	/v3/business_units/{unitId}/menu_board?options={queryParams}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id, allows for -1
options	Json	No	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	10	Number of records per page
options.filter	Json	No	Empty	Filter Options
options.filter.startDate	Date	Yes	N/A	Start Date
options.filter.menuCollectionId	Int	No	Empty – No Filter	Menu Collection Id
options.filter.days	Int	Yes	N/A	Number of Days
options.filter.mealPeriod	Int	No	Empty – No Filter	Meal Period Id
options.filter.mealCategory	Int	No	Empty – No Filter	Meal Category Id
options.filter.dietId	Int	No	Empty – No Filter	Diet Id
options.filter.stationId	Int	No	Empty – No Filter	Station Id
options.filter.searchPhrase	String	No	Empty – No Filter	Filter to limit results to menu items whose names contain the searched phrase options.
options.filter.type	menuTypeEnum	No	Empty – No Filter	Type of Menu
options.filter.changeStartDate	Datetime	No	Empty – No Filter	Initial Date of Changes
options.filter.changeEndDate	Datetime	No	Empty – No Filter	Final Date of Changes
options.include	Json	No	Empty	Include Options
options.include.allergens	Bool	No	String	If allergens should be included in the response, default is false
options.include.nutrientTypes	[nutrientTypeEnum]	No	Standard	Specifies whether Standard / Extended nutrients should be included
options.include.ingredients	Bool	No	False	If ingredients details should be included in

				the response feed, default is false
options.include.tags	Bool	No	False	If tags should be included in the response feed, default is false
options.include.icons	Bool	No	False	If icons details should be included in the response feed, default is false

Ingredients

Provides ingredient/supplied dish detail for the given Business Unit and multiple comma separated Master Reference Numbers with max limit of 10. Response includes: Returns an array of Ingredients with additional resources Nutrients, Allergens, Tags and Pictures are included if requested.

URL	/v3/business_units/{unitId}/ingredients?options={queryParams}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id, allows for -1
locationId	Int	Yes	N/A	Location Id
options	Json	No	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	10	Number of records per page
options.filter	Json	No	Empty	Filter Options
options.filter.mrns	[string]	Yes	N/A	List of master reference numbers
options.filter	Json	No	Empty	Filter Options
options.filter.changeStartDate	Datetime	No	Empty – No Filter	Initial Date of Changes
options.filter.changeEndDate	Datetime	No	Empty – No Filter	Final Date of Changes
options.include	Json	No	Empty	Include Options
options.include.allergens	Bool	No	False	If allergens should be included in the response, default is false
options.include.nutrientTypes	[nutrientTypeEnum]	No	Standard	Specifies whether Standard / Extended nutrients should be included
options.include.pictures	Bool	No	False	If picture details should be included in the response feed, default is false
options.include.tags	Bool	No	False	If tags should be included in the response feed, default is false

Menu Item Deltas

Items with additional resources Nutrients, Allergens, Ingredients, Tags, and Icons are included if requested along with the changes made to collection e.g. (insert, update, delete) and the date when the changes happened.

URL	/serviceapi/v3/business_units/{unitId}/ menu_item_deltas?options={queryParams}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id (-1 for fetching records related to all Business Unit Ids)
options	Json	Yes	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	10	Number of records per page
options.filter	Json	Yes	Empty	Related entities to include
options.filter.locationId	Int	No	Empty – No Filter	Location Id
options.filter.menuCollectionId	Int	No	Empty – No Filter	Menu Collection Id
options.filter.startDate	Date	Yes	N/A	Start Date
options.filter.days	Int	Yes	N/A	Number of Days
options.filter.mealPeriodId	Int	No	Empty – No Filter	Meal Period Id
options.filter.mealCategoryId	Int	No	Empty – No Filter	Meal Category Id
options.filter.dietId	Int	No	Empty – No Filter	Diet Id
options.filter.stationId	Int	No	Empty – No Filter	Station Id
options.filter.searchPhrase	String	No	Empty – No Filter	Filter to limit results to menu items whose names contain the searched phrase options.
options.filter.type	menuTypesEnum	No	Empty – No Filter	Type of Menu
options.filter.changeStartDate	Datetime	No	Empty – No Filter	Initial Date of Changes

options.filter.changeEndDate	Datetime	No	Empty – Not Filter	Final Date of Changes
options.filter.action	OperationsEnum	No	All	Filter changes for each property by operation type: All, Insert, Update, Delete.
options.include	Json	No	Empty	Include Options
options.include.allergens	Bool	No	False	If allergens should be included in the response, default is false
options.include.nutrientTypes	[nutrientTypeEnum]	No	Standard	Specifies whether Standard / Extended nutrients should be included
options.include.ingredients	Bool	No	False	If ingredients details should be included in the response feed, default is false
options.include.tags	Bool	No	False	If tags should be included in the response feed, default is false
options.include.icons	Bool	No	False	If icons details should be included in the response feed, default is false

Recipe with additional resources Nutrients, Allergens, Ingredients, Conversions, Pictures, PreparationSteps, EntityAttributeValues, Tags and Icons are included if requested along with the changes made to collection e.g. (insert, update, delete) and the date when the changes happened.

URL	/serviceapi/v3/business_units/{unitId}/recipe_deltas/{mrn}?options={queryParams}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id
mrn	Int	Yes	N/A	Master reference number of the requested recipe
options	Json	No	Empty	Options for the endpoint
options.include	Json	No	Empty	Related entities to include
options.include.nutrientTypes	[nutrientTypeEnum]	No	Standard	Specifies whether Standard / Extended nutrients should be included
options.include.allergens	Bool	No	False	Specifies whether allergens should be included
options.include.ingredients	Bool	No	False	Specifies whether ingredients should be included
options.include.tags	Bool	No	False	Specifies whether tags should be included
options.include.preparationSteps	Bool	No	False	Specifies whether preparation steps should be included
options.include.pictures	Bool	No	False	Specifies whether pictures should be included
options.include.conversions	Bool	No	False	Specifies whether conversions

				should be included
options.include.icons	Bool	No	False	Specifies whether icons should be included
options.include.entityAttributeValues	Bool	No	False	Specifies whether entity attributes should be included
options.include.AdvancedEdit	Bool	No	False	Specifies whether advancedEdit should be included
options.filter	Json	No	Empty	Filter Options
options.filter. SourceSystem	Enum	No	All	Filter changes for each property by SourceSystem type: All, USA, Canada, Foodbuy_Canada, Foodbuy_USA.
options.filter.changeStartDate	Datetime	No	Empty – No Filter	Initial Date of Changes
options.filter.changeEndDate	Datetime	No	Empty – No Filter	Final Date of Changes
options.filter.action	OperationsEnum	No	All	Filter changes for each property by operation type: All, Insert, Update, Delete.

Menu Template Deltas

Provides a list of menu templates for each menu collection published to a location, for the given Location Id. Response includes: an array of Menu Collections with Meal Periods, Diets, Stations/Meal Categories depending on the type of business along with the changes made to collection e.g. (insert, update, delete) and the date when the changes happened.

URL	/serviceapi/v3/business_units/{unitId}/menu_template_deltas?options={queryParams}
Method	GET
Success Response	Code: 200 - OK

URL Parameters

Parameter	DataType	Required	Default	Description
unitId	Int	Yes	N/A	Business Unit Id (-1 for fetching records related to all Business Unit Ids)
options	Json	Yes	Empty	Options for the endpoint
options.page	Json	No	Empty	Pagination options
options.page.offset	Int	No	1	Current Page
options.page.limit	Int	No	1000	Number of records per page
options.filter	Json	Yes	Empty	Related entities to include
options.filter.locationId	Int	Yes	N/A	Location Id
options.filter.menuCollectionId	Int	No	Empty – No Filter	Menu Collection Id

options.filter.startDate	DateTime	No	N/A	Start Date
options.filter.endDate	DateTime	No	N/A	End Date
	Int	No	Empty – No Filter	Meal Period Id
options.filter.type	menuTypesEnum	No	Empty – No Filter	Type of Menu
options.filter.changeStartDate	Datetime	No	Empty – No Filter	Initial Date of Changes
options.filter.changeEndDate	Datetime	No	Empty – Not Filter	Final Date of Changes
options.filter.action	OperationsEnum	Yes	All	Filter changes for each property by operation type: All, Insert, Update, Delete.
options.filter.SourceSystem	SourceSystemEnum	Yes	All	Filter changes for each property by source system type: All, USA, Canada, Foodbuy_Canada, Foodbuy_USA
